## SEPTEMBER PROGRAM

Thursday September 13<sup>th</sup> - 6:30 PM; wine, cheese and crackers, Legacy Exhibits, and a brief presentation program at the S St Paul Lawshe Memorial Museum.  
*See the top of page 5 for museum parking information.*

At 7:00 PM; U of MN researcher Elizabeth Semler will make a 'status' presentation about the Twin Cities Public Television (TPT) legacy grant developing a documentary about Minnesota's Computer History. This project was started under the leadership of Dale Weeks (former CDC employee & current DCHS trustee) and Rich Daly (former ERA employee). The project is now a collaborative venture between DCHS, TPT, the Charles Babbage Institute at the University of Minnesota, the Minnesota High Tech Association, and the Club's Legacy committee. Ms. Semler is the project's lead researcher and is a doctoral candidate at the University of Minnesota.

TPT has interviewed 20<sup>+</sup> individuals with local computer industry experiences, over half from the VIP Club. Liz will show a few interview video clips and introduce the grant's emerging technology history web site. The TPT filming crew is invited to join us, this is an opportunity to meet them. Thanks to Keith Myhre who helped develop the story line from a UNIVAC/Sperry/UNISYS/LMCO perspective.

There is no charge for this event; but before Sept. 7<sup>th</sup>, please register with a coordinator – include names of those with you so that we can pre-print name tags and buy sufficient Velveeta and Ritz crackers ☺.

Coordinators are Gish Devlaminck (651-470-8905 [membership@vipclubmn.org](mailto:membership@vipclubmn.org)) and Jim Andrews ([James.R.Andrews@comcast.net](mailto:James.R.Andrews@comcast.net) 651-451-7502.)

## OCTOBER PROGRAM

### Fall colors along the St. Croix!

Plan Wednesday Oct. 10<sup>th</sup>, for a St. Croix River sightseeing cruise with included lunch buffet. We will be boarding at 11:00 AM and set sail at 11:30 AM for a 2-hour cruise. We will be off the river by 2 PM, early enough to beat the Highway 36 traffic back home. The boat will depart from the dock of the St. Croix Boat and Packet Co. at 525 South Main St. Stillwater, MN. There are nearby pay parking lots and some free street parking just to the north of the Landing.

To sign up, fill out the **page 5 form** and send it with payment **before September 28<sup>th</sup>**. The cost is \$15 per member and includes an on-board lunch. Grandchildren ages 4 => 12 are \$12. There is a cash bar available for liquid refreshments. We do have to pre-pay for our group two weeks in advance thus we've set the 9/28 registration deadline. Invite your friends to cruise with us, adult non-member guests are \$25.00 per person. Details at <http://vipclubmn.org/StCroixCruise.html>; driving directions, the form, and parking information.

Remember to bring your camera, sun screen, and tourist anticipation of the beautiful Minnesota and

Wisconsin rocks, shorelines, trees, bridges, and wildlife.

Harvey Taipale and Boni Westberg are Coordinators.

## PRESIDENTS MESSAGE

Believe it or not, the VIP Club actually does have a constitution, which (with our by-laws) is available on the club website. To quote from Article III:

**"GOALS:** *The CLUB shall provide an opportunity for social interaction of its members. The CLUB shall provide services and information appropriate to the interest of its members. The CLUB shall provide a mechanism for member services to the community. The CLUB shall provide a forum for information on the heritage and on-going action of the sponsoring business entities and their predecessors."*

Over the past few years, membership and participation in various club activities has been on a gradual but steady downward path. Some of this is expected: both sponsors, Lockheed and Unisys, have significantly declined in employment in the Twin Cities, leading to fewer membership candidates. Culturally, the world seems to be gravitating to a population of non-joiners.

The Board regularly discusses the question of the future of the VIP Club itself. First of all, everyone should be assured that the club is financially solvent, has a full complement of leaders, and expects to continue for the foreseeable future. However, if we are to fully meet the goals in our constitution, we may need to change some of our traditional thinking or activities.

I recall one of Earl Joseph's presentations on the science futurism. Basically, he said that a futurists job was to project the range of possible futures and then work toward choosing and implementing the one that is best suited to the organization.

Consider this to be your challenge to imagine the future of the VIP Club. Then share your thoughts by contacting any board member with your thoughts so that our full range of futures can be considered in the ongoing life of the club. *Harvey Taipale*, VIP Club President.

## SOCIAL ACTIVITIES

**Fagen Museum:** The Board decided to cancel this planned August excursion because we had not received sufficient registrations to fill the 56-passenger to an 80% level. Registration checks were refunded.

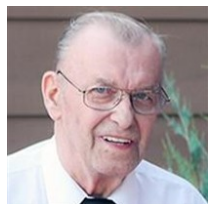

**Dear Unisys Retirees:** "My dad, L. R. Peterson, was a lifetime Unisys employee. He was a working alumnus of Kwajalein, Carnarvon, Seychelles, Guam, Greenland and Hawaii. I am writing partly because I want to suggest to retirees that if they have money with Fidelity, they need to make sure they name a beneficiary. At least some of the {nightmare} story I describe could have been avoided if Dad had named a beneficiary. My Dad died in June of 2017 at the age of 86.

He was a Unisys computer engineer with a top-secret security pass. He worked for most of his life within the American first line of defense systems as a satellite tracking engineer, which involved spending long stints of time in places like Greenland. He was a patriotic

American and quite proud of the role America played in the world as a peace keeper and innovator. He, like so many men and women of his generation, believed in the land of the free and the home of the brave.” {Fidelity communications stretched over a full year – excluded herein for brevity; contact webmaster if you’d like an email copy.} Australian daughter, *Junine Keala*

**LEGACY ACTIVITIES**

**How is your memory?** Can you identify the application of these 1958 UNIVAC printed circuit boards? Mark Greenia sent us the snapshots and needs your ID help.

These are 4.5" x 6", with ~33 pin connectors. The P/Numbers at the left are most likely Assembly Part Numbers, stamped at the right are manufactured dates, i.e. 58 0401. What is the center 495-... number?

**Retirement Status and Benefits:**

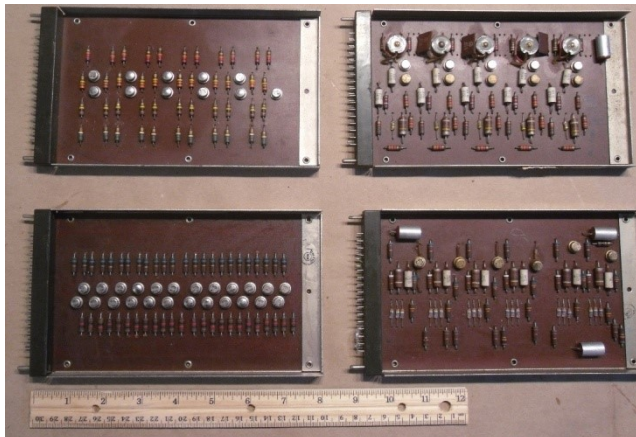

Numbers to call if you or your heirs have death benefit or pension questions – you will need SSN and a PIN.

Unisys	1-877-864-7972
Lockheed Martin	1-866-562-2363

**LIGHTER SIDE**

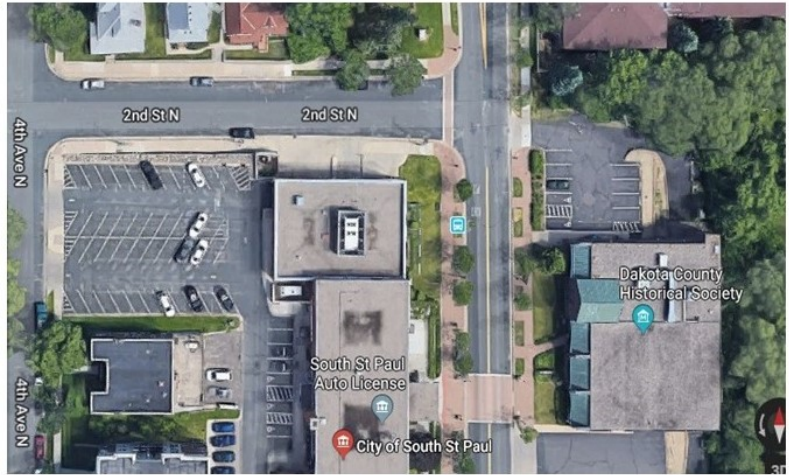

**Just smile or ponder awhile!**

- A flashlight is a carrying case for dead batteries.
- All I ask is a chance to prove that money can't make me happy.
- How can there be self-help "groups"?
- I had amnesia once - or twice.
- I used to be indecisive. Now I'm not sure.
- I'd give my right arm to be ambidextrous.
- Is it my imagination, or do buffalo wings taste like chicken?
- Is it possible to be totally partial?
- Is Marx's tomb a communist plot?
- Is there another word for synonym?
- It's not an optical illusion. It just looks like one.

From the transistor count, the bottom left board looks like 12 Resistor-Transistor Logic flip-flops. The top right looks like pulse transformer circuits, either
